

PeerCafe

Food Delivered for students, by students

Group 2 - Himanshu Agarwal, Mason Cormany, Omkar Joshi,
Mulya Patel, Jawad Saeed

MISSION STATEMENT

WolfCafe is a student-powered, peer-to-peer food delivery platform that offers faster, greener, and more affordable service while building a campus community. We match student orders to student riders who are compensated with cash, meal credits or coupons to provide an affordable option to deliver food where everyone benefits.

STAKEHOLDERS

Admin

user management, monitoring performance of staff and app

Customer

maintain & update app, troubleshoot any errors

Staff

place orders for student riders to deliver

Riders

Accept delivery requests, earn money/credits, ensure timely delivery.

MILESTONES

October (Release 1)

Core Ordering System – Customers can browse menu, add items to cart, and place orders with tax and tip calculation.

Staff Fulfillment Dashboard – Staff view incoming orders, mark them as prepared/fulfilled, and update inventory.

Student Rider Module (MVP) – Students can log in as riders, view pending orders, and claim one for delivery.

Secure Handoff Flow – Confirmation number required at pickup and delivery to prevent mix-ups.

November (Prototype 2)

Incentives & Rewards – Student riders earn credits (cash, loyalty points, or meal discounts) per completed delivery.

Delivery Optimization – Simple route/distance calculator so riders can see estimated travel time and payout before accepting.

Dietary & Allergy Filters – Customers filter menu by vegetarian, vegan, gluten-free, or allergy-friendly items.

Sustainability Features – Introduce “Green Delivery” (bundled orders for nearby customers) and a “Rescue Meals” option for end-of-day discounted food.
